

Senator the Hon Anthony Chisholm
Assistant Minister for Education
Assistant Minister for Regional Development

Reference: MS24-000776

Senator the Hon Sue Lines
President of the Senate
Parliament House
CANBERRA ACT 2600

Dear President

I write on behalf of my colleague, the Hon Jason Clare MP, Minister for Education in response to the Notice of Motions moved by Senator the Hon Sarah Henderson for the Order of Production of Documents by no later than midday on 19 September 2024:

- Senate Notice of Motion No. 622 agreed by the Senate on Tuesday 17 September 2024; and
- Senate Notice of Motion No. 624 agreed by the Senate on Wednesday 18 September 2024

The Minister for Education has sought to comply with these requests. Please find his responses enclosed.

Yours sincerely

A handwritten signature in black ink, appearing to read 'A. Chisholm', with a long, sweeping flourish extending to the right.

Anthony Chisholm

19/9/2024

Encl. Letter from the Hon. Jason Clare MP, Minister for Education

The Hon Jason Clare MP
Minister for Education

Reference: MS24-000776

Senator the Hon Anthony Chisholm
Senator for Queensland
Assistant Minister for Education
Parliament House
CANBERRA ACT 2600

Dear Senator

On 17 and 18 September 2024, the Senate agreed on General Business Notice of Motion No.622 and 624 respectively, relating to the provision of international student data for higher education providers, and correspondence with universities on international education. The motions were moved by Senator the Hon Sarah Henderson.

In response to these orders, I request you table the data enclosed together with copies of letters sent to each public university regarding the Education Services for Overseas Students Amendment (Quality and Integrity) Bill 2024 and Ministerial Direction 107.

Notice of Motion No. 622

The data in response to question 1 (c), (d) and (e) relates to higher education students only and are sourced from the Tertiary Collection of Student Information (TCSI). In some cases the providers listed will also have VET students but these are not included in the data supplied and the data is the responsibility of the Department of Employment and Workplace Relations.

For all higher education providers, the response to question 1 (c), (d) and (e) includes:

- The number of onshore international students (headcount) for 2019, 2022 and 2023
- The total number of onshore students (domestic + onshore international) for 2019, 2022 and 2023, and
- Onshore international students as a proportion of total onshore students for the 2019, 2022 and 2023.

Cell counts less than 5 have been suppressed as per standard practice.

Verified 2024 higher education student data from TCSI will not be available before mid-2025 and is therefore not included.

The Selected Higher Education Statistics – 2023 Student data report is available at:
<https://www.education.gov.au/higher-education-statistics/student-data/selected-higher-education-statistics-2023-student-data>

The data requested by the Senate raise valid considerations regarding commercially sensitive information. In order to respond appropriately to the terms of the Senate motions, the data is provided in full irrespective of these considerations.

Notice of Motion No. 624

The department and my office conducted searches of the correspondence requested under Notice of Motion No. 624 and I have enclosed letters that fall within the scope of the request.

I trust this information is of assistance.

Yours sincerely

JASON CLARE

19 / 09 / 2024

Encl:

Higher Education Onshore International Students 2019, 2022 and 2023

Correspondence drafted by the department for Minister Clare to universities on the Education Services for Overseas Students Amendment (Quality and Integrity Bill) 2024 and Ministerial Direction 107.

General Business - Notice of Motion No. 622 – 1 (a) – New overseas student commencements (NOSC) for 2019, 2022, 2023 and year-to-date July 2024

- For further details on the calculation of NOSC, see: [Factsheet - Implementing Provider Limits in PRISMS - Department of Education, Australian Government](#). For some providers, NOSC will be significantly different from total commencements in the relevant year as certain students exempt from the National Planning Level (e.g. higher degree research students, students studying standalone ELICOS courses) have been excluded from the NOSC calculation.
- This list reflects data available in the Provider Registration and International Student Management System (PRISMS) at the time of extraction.
- Some providers hold multiple registrations in the Commonwealth Register of Institutions and Course for Overseas Students (CRICOS) and may be shown as a single provider in this list.
- These figures relate to higher education (HE) only. Note that these figures include a small number of new commencements which will be exempt from the proposed provider limits (e.g. students holding key partner foreign government scholarships).
- 2024 data is a preliminary estimate of expected HE NOSCs for each provider produced by the Department, based on activity to date (June 2024 for publicly funded universities, July 2024 for other providers). Actual 2024 NOSCs will only be known in 2025. 2024 NOSCs are only used in the National Planning Level methodology in limited circumstances.

General Business - Notice of Motion No. 622 – 1 (b) – Indicative international student profiles as proposed for 2025

- Allocations are expressed in terms of new overseas student commencements (NOSC). For further details on NOSC, see: [Factsheet - Implementing Provider Limits in PRISMS - Department of Education, Australian Government](#).
- Some providers hold multiple registrations in the Commonwealth Register of Institutions and Course for Overseas Students (CRICOS) and may be shown as a single provider in this list.
- These allocations reflect higher education only. If an organisation also delivers vocational education and training (VET) to international students under the same CRICOS registration, its total enrolment limit in 2025 will be the sum of this limit and the allocation provided by the Department of Employment and Workplace Relations for its new overseas VET student commencements.
- This list includes a number of providers with zero allocations due to a range of factors. Some of these providers did not have any CRICOS courses registered in higher education, only delivered exempt courses such as ELICOS, or were dormant providers that had not delivered new overseas student commencements in higher education recently.
- The Department has sought comment from providers on the data underpinning their indicative allocations. This may result in some change to allocations before they are finalised.

General Business - Notice of Motion No. 622 - (1)(c), (d) and (e) - Enrolments for Onshore International students and Domestic Students in 2019, 2022 and 2023

- Data relate to higher education students only and are sourced from the Tertiary Collection of Student Information (TCSI). Higher Education providers that are approved under the *Higher Education Support Act 2003* (HESA Act) are required to report data to TCSI. Approval under the HESA Act is not a requirement for registration under the *Education Services for Overseas Students Act 2000* (ESOS Act) and there are some providers with 2025 indicative allocations that do not appear in the table below.
- Request (1c) and (1d) referred to the number of students, whereas request (1e) referred to a proportion of enrolments. (1e) has been calculated as a proportion of students for consistency with (1c) and (1d). A student may have multiple enrolments in a year.
- In some cases the providers listed will also have VET students but these are not included in the data supplied and are the responsibility of the Department of Employment and Workplace Relations. VET student numbers may significantly change the overall proportions of students at a provider.
- Cell counts less than 5 have been suppressed as is standard practice.
- The total student numbers published in the Selected Higher Education Statistics – 2023 Student report include an additional cohort of international students studying offshore. Hence published total students (and total overseas students) will differ from totals reported here (which are the sum of domestic and onshore international students only).
- Verified 2024 higher education student data from TCSI will not be available before mid-2025.
- The numbers of onshore international students have been calculated using the citizen resident status data recorded in TCSI.

Professor Colin Stirling
President and Vice-Chancellor
Flinders University
GPO Box 2100
ADELAIDE SA 5001

By email: ovc@flinders.edu.au

Dear Professor Stirling

Thank you for your correspondence of 27 March 2024 regarding the Australian Government's Migration Strategy and its impacts on international student visa processing. I wanted to write to you following the announcement of the Draft International Education and Skills Strategic Framework (Draft Framework).

Reforms under the Migration Strategy include making the visa system simpler and more efficient, replacing the Genuine Temporary Entrant requirement with a Genuine Student requirement and introducing higher English language requirements for international students and graduates for all universities. I appreciate your concerns about student visa processing reforms that focus on quality and integrity and the impact on the financial situation of universities. I note the challenges that Ministerial Direction 107 has posed to Flinders University's international student cohort, particularly to students of the twinning collaboration with the Rajagiri School of Engineering and Technology.

While the student visa program and the processing of student visas are a matter for the Hon Clare O'Neil MP, Minister for Home Affairs, the Department of Education is closely monitoring the impact on universities. I have copied this letter to Minister O'Neil who is able to provide more detail on visa processing matters.

The Government will work closely with you and the international education sector to manage the system to deliver sustainable growth over time. The Draft Framework and amendments to the *Education Services for Overseas Students Act 2000* introduced on 16 May 2024 provide a path for government and the sector to work together so international education can continue to deliver benefits to our economy, communities and international students. I am pleased with how the sector has engaged with the department and thank you for your involvement in the process.

I trust this information is of assistance.

Yours sincerely

JASON CLARE

5/6 /2024

The Hon Jason Clare MP
Minister for Education

Professor Zlatko Skrbis
Vice-Chancellor and President
Australian Catholic University
North Sydney NSW 2059
By email: zlatko.skrbis@acu.edu.au

Dear Professor Skrbis

I have received representations regarding Ministerial Direction 107 from a number of Vice-Chancellors.

The Albanese Government is committed to reducing Net Overseas Migration to Australia to pre-pandemic levels. As you know, the number of international students in Australia is at an all time high. A part of returning to pre-pandemic migration levels is reducing the number of international students that come to Australia. To do this, the Government is currently controlling the number of international students coming into the country through Ministerial Direction 107.

The sector has been critical of this – pointing to uneven distribution of students between metropolitan and regional universities and budget uncertainty that this has caused.

The legislation that is currently before the Parliament fixes this by providing certainty through giving each higher education provider a number of international students that can be enrolled and more evenly distributing those students through a better and fairer system. This was done at the request of some Vice-Chancellors who expressed concern about the consequences of Ministerial Direction 107.

I can confirm that Ministerial Direction 107 will be lifted upon Royal Assent of the amendments to the *Education Services for Overseas Students Act 2000* currently before the Parliament.

Any delays to Royal Assent will delay the lifting of Ministerial Direction 107. Should the bill not pass, I can also confirm that Ministerial Direction 107 will remain in place to allow the Government to achieve its goal of reducing the level of migration.

I look forward to continuing to work with you to improve the Bill and to ensure that universities maintain their social licence to deliver international education.

Yours sincerely

The Hon Jason Clare MP
Minister for Education

Professor Arshad Omari
Interim Vice-Chancellor and President
Edith Cowan University
Joondalup WA 6027
By email: vc@ecu.edu.au

Dear Professor Omari

I have received representations regarding Ministerial Direction 107 from a number of Vice-Chancellors.

The Albanese Government is committed to reducing Net Overseas Migration to Australia to pre-pandemic levels. As you know, the number of international students in Australia is at an all time high. A part of returning to pre-pandemic migration levels is reducing the number of international students that come to Australia. To do this, the Government is currently controlling the number of international students coming into the country through Ministerial Direction 107.

The sector has been critical of this – pointing to uneven distribution of students between metropolitan and regional universities and budget uncertainty that this has caused.

The legislation that is currently before the Parliament fixes this by providing certainty through giving each higher education provider a number of international students that can be enrolled and more evenly distributing those students through a better and fairer system. This was done at the request of some Vice-Chancellors who expressed concern about the consequences of Ministerial Direction 107.

I can confirm that Ministerial Direction 107 will be lifted upon Royal Assent of the amendments to the *Education Services for Overseas Students Act 2000* currently before the Parliament.

Any delays to Royal Assent will delay the lifting of Ministerial Direction 107. Should the bill not pass, I can also confirm that Ministerial Direction 107 will remain in place to allow the Government to achieve its goal of reducing the level of migration.

I look forward to continuing to work with you to improve the Bill and to ensure that universities maintain their social licence to deliver international education.

This was done at the request of some Vice-Chancellors who expressed concern about the consequences of Ministerial Direction 107.

I can confirm that Ministerial Direction 107 will be lifted upon Royal Assent of the amendments to the *Education Services for Overseas Students Act 2000* currently before the Parliament.

Any delays to Royal Assent will delay the lifting of Ministerial Direction 107. Should the bill not pass, I can also confirm that Ministerial Direction 107 will remain in place to allow the Government to achieve its goal of reducing the level of migration.

I look forward to continuing to work with you to improve the Bill and to ensure that universities maintain their social licence to deliver international education.

Yours sincerely

JASON CLARE

The Hon Jason Clare MP
Minister for Education

Professor Amit Chakma
Vice-Chancellor
The University of Western Australia
Perth WA 6009
By email: vice-chancellor@uwa.edu.au

Dear Professor  Chakma

I have received representations regarding Ministerial Direction 107 from a number of Vice-Chancellors.

The Albanese Government is committed to reducing Net Overseas Migration to Australia to pre-pandemic levels. As you know, the number of international students in Australia is at an all time high. A part of returning to pre-pandemic migration levels is reducing the number of international students that come to Australia. To do this, the Government is currently controlling the number of international students coming into the country through Ministerial Direction 107.

The sector has been critical of this – pointing to uneven distribution of students between metropolitan and regional universities and budget uncertainty that this has caused.

The legislation that is currently before the Parliament fixes this by providing certainty through giving each higher education provider a number of international students that can be enrolled and more evenly distributing those students through a better and fairer system. This was done at the request of some Vice-Chancellors who expressed concern about the consequences of Ministerial Direction 107.

I can confirm that Ministerial Direction 107 will be lifted upon Royal Assent of the amendments to the *Education Services for Overseas Students Act 2000* currently before the Parliament.

Any delays to Royal Assent will delay the lifting of Ministerial Direction 107. Should the bill not pass, I can also confirm that Ministerial Direction 107 will remain in place to allow the Government to achieve its goal of reducing the level of migration.

I look forward to continuing to work with you to improve the Bill and to ensure that universities maintain their social licence to deliver international education.
